HAYSTACK PEOPLE

DevOps Engineer

Established | Vast | 100k

COMPANY PROFILE

This is an opportunity to join a fast-growing technology organization that is heavily investing in platform engineering, cloud infrastructure, and automation. The engineering culture is modern, pragmatic, and built around ownership, collaboration, and technical quality.
The company is currently consolidating multiple platforms into a scalable multi-tenant SaaS environment and is looking for a Senior DevOps Engineer who wants to help shape the foundation of that journey.

JOB DESCRIPTION

As a Senior DevOps Engineer, you'll design, evolve, and own the AWS-based infrastructure. You'll work in a greenfield environment with modern tooling, helping shape a scalable, secure, and reliable foundation for the growing SaaS ecosystem.

Your key responsibilities:

- Own and improve AWS-based infrastructure managed with Terraform
- Drive the evolution of our multi-tenant SaaS setup for scalability and security
- Maintain and expand CI/CD pipelines using GitHub Actions
- Ensure reliable Docker usage across development, testing, and deployments
- Manage identity and access solutions (FusionAuth, Google)
- Implement and enhance observability (Sentry, CloudWatch)
- Champion security, privacy, and compliance best practices
- Collaborate closely with developers, QA, and product teams

FUNCTIE EISEN

TERMS OF EMPLOYMENT

- Excellent salary up to 100K.
- Pension scheme
- 26 vacation days
- Free daily lunch at the office
- Hybrid setup: 2 days on site, 3 days remote
- Team events such as BBQs and Christmas dinners
- Must be based in the Netherlands
- No visa sponsorship (IND)
