WHAT DO THEY DO?

If you want to work for an employer to be proud of, then read on! This approachable organization is part of the market leader in the field of marketing technology. By merging with 6 other organizations, they have emerged as the European superpower, sending more than 15 billion messages per year! As you can imagine as a developer, this requires a solid foundation.

So what does our client do as part of the group? They create the technology behind the domains of webcare, messaging, chatbots, media monitoring and data analytics. They build easily accessible solutions to generate as much engagement as possible between customers and organizations. As such, they have already helped more than 1,400 customers from B2B to B2C! With their SaaS, they are the only all-in-one solution in the Netherlands.

It doesn't just stop at offering the software, but also with generating data. Through this data, strategic business processes can be changed and sales can be increased. So important piece of software!

WHAT WILL YOU BE DOING?

Because they want to scale up the products, they need extra hands in the field of data visualization, among other things. Because of the different products they have, your work is nice and diverse, because you will be working on the front end of all SaaS products. You will contribute to the mission of connecting customers and organizations to the maximum extent possible.

This team works in a nice flat culture with a "we can do" mentality. This motivates you to provide your own input and ideas and creates freedom and responsibility in your work. What will you be working on?

- Working closely with the designer and PO to define specifications of new features
 - Implementing the features
 - Writing tests to check the implementations
 - Fixing bugs
 - Rewriting older parts to improve the applications
-

WHEN ARE YOU QUALIFIED?

In addition to hard skills, it is also important that you fit into this close-knit team. You like to have fun in your work and with your colleagues, everyone here is social and open to helping each other. So when someone is having headphones on, it doesn't mean that questions can't be asked!

A medior developer has at least 3 years of experience with:

- Angular
- Typescript
- HTML5/SCSS
- Experience in SaaS environments

WHAT WILL YOU GET IN RETURN?

A cool company naturally includes good working conditions:

- Salary up to €70 k

- 8% holiday pay
- 25 holiday days
- 20 euro net home office allowance
- 20 euro net internet allowance
- Energy bonus of €2 k per year
- Fully paid pension!
- Self development opportunities through courses.
