COMPANY PROFILE

ReduCate is a fast-growing group of e-learning companies on a mission to become Europe's leading platform for professional education. We serve regulated industries — including law, medicine, transport, and education — where continuous learning is mandatory. After successfully migrating our first tenant to a new multi-tenant platform, we're now consolidating systems, standardizing infrastructure, and scaling across brands. You'll join a technically mature, collaborative engineering team with a high bar for quality and autonomy.

JOB DESCRIPTION

As a Senior DevOps Engineer, you'll design, evolve, and own ReduCate's AWS-based infrastructure. You'll work in a greenfield environment with modern tooling, helping shape a scalable, secure, and reliable foundation for our growing SaaS ecosystem.

Your key responsibilities:

- Own and improve AWS-based infrastructure managed with Terraform
 - Drive the evolution of our multi-tenant SaaS setup for scalability and security
 - Maintain and expand CI/CD pipelines using GitHub Actions
 - Ensure reliable Docker usage across development, testing, and deployments
 - Manage identity and access solutions (FusionAuth, Google)
 - Implement and enhance observability (Sentry, CloudWatch)
 - Champion security, privacy, and compliance best practices
 - Collaborate closely with developers, QA, and product teams
-

TERMS OF EMPLOYMENT

- Excellent salary up to 100K.
 - Pension scheme
 - 26 vacation days
 - Free daily lunch at the office
 - Hybrid setup: 2 days on site, 3 days remote
 - Team events such as BBQs and Christmas dinners
 - Must be based in the Netherlands
 - No visa sponsorship (IND)
-
