HAYSTACK PEOPLE

DevOps Engineer Amsterdam | Crypto |105K+

ScaleUp | Vast | 80k

COMPANY PROFILE

Our client is a leading **crypto broker** based in **Noord-Holland**, with a mission to make cryptocurrency trading simple and accessible. Processing **tens of thousands of transactions daily**, their platform's success relies on a robust and scalable infrastructure, supported by their expert **DevOps team**.

With approximately **100 professionals**, the team is both **tight-knit** and **ambitious**. Their modern office in **North Holland** provides an inspiring environment, complete with a **private gym**, **company bar**, and **relaxation areas**. This dynamic workspace fosters **collaboration**, **creativity**, and **innovation**.

The **DevOps team** plays a critical role in ensuring **platform stability**, automating deployments, and optimizing performance. Their focus includes building **redundant systems**, maintaining compliance, and delivering a seamless trading experience for their growing user base.

JOB DESCRIPTION

As a **DevOps Engineer**, you will take on responsibilities that bridge **cloud management** and **system administration**, with a primary focus on supporting **IT** and **DevOps teams**.

In this role, you will:

- Utilize your **hands-on skills** to manage and optimize systems, ensuring performance and scalability.
- Play a key part in setting up **redundant systems and networks** within the office environment, enhancing system reliability and minimizing downtime.
- Act as a **coach and mentor** to team members, sharing knowledge and guiding them to develop their technical expertise.
- Design, develop, and maintain **microservice-based web application cloud infrastructures** in **Google Cloud Platform (GCP)**, leveraging best practices.
- Work with **Kubernetes** for container orchestration and **Terraform** for infrastructure as code, ensuring automation and consistency across deployments.

REQUIREMENTS

- Extensive experience in designing and managing **cloud infrastructures** for **scalable, distributed applications**, preferably using a major cloud provider.
- Hands-on expertise with **container orchestration tools** and **infrastructure as code solutions** to enable automation and deployment consistency.
- Strong background in **building and maintaining systems** that support **microservices architectures** in a cloud environment.

WHAT YOU GET IN RETURN

Joining our client means becoming part of an **ambitious and engaged team**. Here's what you can expect:

- **Innovative projects** in the dynamic world of crypto.
- **Salary up to €105k**.
- A **modern office** with a private gym, company bar, and relaxation areas.

- **Daily perks** such as free lunch, fresh fruit, and Friday afternoon drinks.
- A **pension plan** and **commuting allowance**.
- **25 vacation days**.
- **Monthly chair massages** and access to the Alleo benefit program.
- A **€250 home office setup budget**.
- **Regular team activities** and outings to keep the energy high.

Are you excited about this opportunity? **Apply now** via the button or send your CV to **info@haystackpeople.nl** We look forward to hearing from you!
