COMPANY PROFILE

Are you a senior DevOps Engineer and do you want to work for clients such as Netflix, Apple, and Videoland? Then we got your future job!

From creation and management to worldwide distribution: Our client offers the most innovative solutions for video content. By pioneering products and services for automated ingest, content distribution, launching over-the-top video content, and monitoring and managing video content, they simplify the business processes for their clients.

Our client delivers the largest online media platforms in the Netherlands for clients such as NPO, FOX Sports, Videoland, and Pathé Thuis. Their international customer portfolio includes Apple, Netflix, HBO, and Discovery. When it comes to media technology, They can say that they are the market leader. The team with more than 3,000 employees of which about 50 developers are driven by passion and a focus on technical innovation, and together they have supported productions in over 65 countries on all seven continents.

JOB DESCRIPTION

Of course you want to know what you are going to do! Therefore, here is an overview of a number of tasks!

- Design and develop systems and processes that support highly available, scalable, fault-tolerant software deployments.
- Design, develop, and deploy tools and frameworks to improve software release velocity.
- Build and maintain the environments and processes that create efficiencies for developers.
- Add quality checks and test automation for your Infrastructure as Code.
- Automate provisioning of infrastructure and code by leveraging the latest in configuration management tools and containers.
- Take part in initiatives to design and build globally scaled platforms.
- Mentor junior and trainee engineers in their daily work

Tech stack:

- Platform: GCP, AWS, Rancher, Kubernetes;
- Monitoring: Prometheus, Grafana, Zabbix;
- Logging: Graylog, elastic search, loki;
- IaC: Terraform;
- Config Management: Ansible, Puppet;
- CI/CD: GitHub Enterprise, Spinnaker, ArgoCD;
- Repositories: GitHub, Artifactory;
- Scripting: Bash, Python, JS, GO.

JOB REQUIREMENTS

- A pragmatist who loves tackling media technology challenges of serious complexity;
- Ambitious and motivated to be the best in your profession;

- Leader by example;
- Able to balance deadlines and guide your stakeholders to maximum impact.
- As interested in fresh perspectives from junior talent as you are invested in the knowledge of experienced leaders.
- Constantly up-to-date on technological advancements;
- Able to choose and adopt technologies based on requirements;
- Composed and resourceful when faced with production level challenges;
- Experience with (most) techniques mentioned earlier

OFFER

Our client offers an alternate job in an open and collegial work environment. You work in an enthusiastic and passionate team and get well-trained and supervised during your work. Of course, they offer a competitive salary and working conditions.
