## WHAT DO THEY DO?

Our client is the market leader in the domain of EdTech platforms in Europe, specializing in online professional education. It is the result of a merger between two market leaders from the Netherlands and Denmark, with a clear ambition to become the largest EdTech platform in Europe. The platform offers an extensive catalog of over 2,500 online courses, catering to the learning needs of more than 100,000 professionals across almost 40 different fields.

The company initially started with a focus on providing Professional Education for medical professionals. Over time, it expanded its offerings to include a wide range of courses across various subjects. A notable innovation is the subscription model, which grants participants access to a diverse array of over 1,600 courses per day through an education-as-a-service platform.

With a strong presence in the Netherlands and Denmark, our client has headquarters in Utrecht and Copenhagen. With around 100 colleagues, you'll find yourself in a welcoming environment filled with knowledge and camaraderie.

## WHAT ARE WE LOOKING FOR?

What Are We Looking For? As a Senior Frontend Developer on the EdTech platform, you'll be part of a dynamic and ambitious international team, working on the development of innovative web applications and apps for professional education. With the merger of two market leaders and the goal of becoming Europe's largest EdTech platform, you have the opportunity to play a key role in shaping the future of online learning.

You'll be responsible for building high-quality solutions that seamlessly align with the needs of various industries. Your expertise in working with modern technologies such as JavaScript frameworks (React) and other relevant tools will enable you to create innovative and user-friendly web applications.

Beyond your technical skills, you're also a creative problem solver and a team player. You'll be involved in the design process, actively contributing ideas for new possibilities in our educational environment and contributing to system improvements. Your ability to write clean code and prioritize UX and design are crucial for delivering top-notch user experiences.

In summary: Someone fully committed to contributing to the development of a centralized Ed-Tech platform.
