WHAT DO THEY DO?

Our client is proud to be at the forefront of EdTech in Europe. Their company is the result of a successful merger between two dominant market leaders from the Netherlands and Denmark, with a bold vision of becoming the continent's largest EdTech platform. Their platform boasts an extensive selection of over 2,500 online courses, catering to the diverse learning needs of over 100,000 professionals across nearly 40 distinct fields.

They began their journey by focusing on providing Professional Education for medical practitioners. However, their growth has been phenomenal, extending their offerings to encompass a wide spectrum of courses across diverse subjects. Notably, their subscription model has been a game-changer, granting participants daily access to an ever-evolving array of more than 1,600 courses through our education-as-a-service platform.

With a strong presence in Utrecht and Copenhagen, Our client's dynamic team of around 100 colleagues thrives in an environment of knowledge sharing and collaboration.

WHAT ARE WE LOOKING FOR?

As a Senior Frontend Developer on this EdTech platform, you'll be an integral part of our ambitious international team. Your role involves shaping innovative web applications and apps for professional education. With the merger of two industry leaders and their aspiration to be Europe's premier EdTech platform, you'll play a pivotal role in shaping the future of online learning.

Your responsibilities encompass building top-tier solutions that seamlessly cater to various industries' needs. Your proficiency in modern technologies such as JavaScript frameworks (particularly React) and other relevant tools will empower you to craft user-friendly, cutting-edge web applications.

Beyond technical prowess, they seek a creative problem solver and a collaborative team player. You'll contribute actively to the design process, offering ideas that enrich our educational ecosystem and contribute to system enhancements. Your ability to write clean code and prioritize user experience and design are vital for delivering exceptional user interactions.

In essence, we're searching for someone deeply committed to advancing a centralized EdTech platform.
