WHAT DO THEY DO?

Our client is a Dutch-based educational technology company specializing in the development of digital learning resources for mathematics education. The company is committed to revolutionizing the teaching and learning of mathematics by leveraging the power of technology to create engaging and interactive educational experiences. Our client's primary focus is on providing innovative solutions for mathematics instruction across various educational levels, ranging from elementary to higher education.

At the core of our client's offerings are its digital learning platforms and teaching methodologies, which are designed to enhance student engagement, comprehension, and retention of mathematical concepts. These platforms incorporate adaptive learning algorithms, allowing them to personalize the learning experience for each student based on their individual strengths, weaknesses, and learning pace.

One of the key features of our client's products is their emphasis on interactivity and hands-on learning. Through interactive simulations, visualizations, and exercises, students can explore mathematical concepts in a dynamic and intuitive manner, fostering deeper understanding and problem-solving skills.

Our client's educational resources are aligned with national and international curriculum standards, ensuring that they complement and support existing mathematics curricula. Additionally, the company provides comprehensive teacher support materials, including lesson plans, assessments, and analytics tools, empowering educators to effectively integrate technology into their teaching practices and monitor student progress.

WHAT ARE YOU GOING TO DO?

we are looking for a Frontend Senior Developer who can bring substantial expertise, particularly in code architecture, design patterns, and ensuring codebase integrity, to help drive the project's success.

- Providing expertise in code architecture and structuring to enhance the overall quality and maintainability of our codebase.
 - Offering insights into common software design patterns within the React ecosystem, guiding the team in adopting best practices.
 - Collaborating with team members to address code architecture questions and ensure the effective structuring of our codebase.
 - Bringing a depth of knowledge and experience that surpasses that of other team members, contributing to the continuous improvement of our development processes.
-

WHAT YOU NEED TO HAVE

As a frontend developer you will need to have:

- 4+ years of React experience
- You have worked on architectural level
- You know how to test your code. Unit, integration or end to end
- Communicative skills
- Ability to help junior and medior developers to develop themselves

ARBEIDSVORWAARDEN

- Salary up to €62K gross based on 40 hours per week

- 32-40 hours per week
- 25 vacation days
- A healthy pension
- Bonus scheme based on results
- A hybrid work environment with only 1 day at the office per week
