## YOUR EMPLOYER:

We are a cutting-edge AI startup that develops intelligent AI agents to automate customer service, reducing operational costs while boosting efficiency. With recent Series A funding, we are scaling rapidly, expanding our engineering team to drive AI-powered automation across industries. Our platform centralizes real-time customer data, enabling businesses to deploy AI solutions with full visibility and control over decision-making.

With an international, highly skilled team based in Utrecht, we foster a collaborative culture that balances office-based teamwork and remote flexibility. Now is the time to join us and be part of this transformative journey!

## YOUR ROLE:

Let's Engaige is growing fast, and we're looking for a backend developer who can help scale, optimize, and professionalize our AI automation platform. If you love building high-performance systems, optimizing infrastructure, and working with cutting-edge AI technology, this is the role for you.

As a backend developer, you'll design and build scalable backend services that integrate AI models into customer workflows. You'll collaborate closely with machine learning engineers and DevOps specialists to refine cloud infrastructure, enhance system security, and streamline CI/CD pipelines. Your work will directly impact the reliability and performance of AI-driven customer service solutions.

This is an opportunity to take ownership in a fast-moving, venture-backed startup. If you thrive in an innovative environment where you can experiment, optimize, and scale, you'll fit right in.

---

## WHAT IS REQUIRED?

- Experience as a backend developer, working with **Python, Go, or Golang**
- Hands-on experience with **FastAPI** or similar backend frameworks
- Knowledge of **Google Cloud, AWS, or Azure**
- Experience with **Terraform** or other infrastructure-as-code tools
- Strong understanding of **scaling distributed systems and optimizing backend performance**
- Proficiency in **API design, RESTful services, and microservices architecture**
- Experience with **PostgreSQL** or similar databases, plus caching solutions
- Familiarity with **CI/CD pipelines** (GitHub Actions, Jenkins, etc.)
- **Bonus:** Experience integrating **LLMs and AI-driven automation**
- You **live in the Netherlands** and are legally authorized to work her

## WHAT IS OFFERED?

- **Competitive salary**
- **Hybrid work model** with a modern workspace in Utrecht

- **25 vacation days** to ensure a healthy work-life balance
- Work with **cutting-edge AI and machine learning technologies**
- The opportunity to **lead, innovate, and scale** in a venture-backed AI startup

### **Interested?**
