COMPANY PROFILE

Our client is the heartbeat of their customers' operations, providing a cutting-edge ERP system that streamlines complex business processes and enables the efficient shipment of millions of products across the Netherlands, Europe, and beyond. What sets them apart is their commitment to innovation and customer-centricity. Their software is designed to be flexible and future-proof, differentiating them from competitors who often rely on outdated systems.

Their mission is to empower businesses by providing the tools they need to succeed. With a dedicated team spread across the Netherlands and Canada, our client fosters a culture of openness, collaboration, and continuous improvement. They learn from mistakes, celebrate successes, and consistently strive to exceed customer expectations. As part of this rapidly growing organization, you'll have the opportunity to work with talented professionals and contribute to the ongoing development of their innovative ERP system.

JOB DESCRIPTION

As a Software Developer, you will play a key role in creating software solutions that help customers and partners optimize their business processes. You'll be responsible for developing custom solutions in JavaScript and TypeScript, closely collaborating with product managers, customer-facing teams, other developers, and the Quality Assurance department. Your work will involve both the development of new features and the enhancement of internal tools that improve the efficiency of the team.

In this role, you will be tasked with analyzing and resolving technical issues, implementing configuration changes, testing software, and addressing service requests promptly. You will thrive in a dynamic environment where priorities can shift rapidly, and you'll have the chance to continually develop your skills by working with a sophisticated tech stack, including Kubernetes, Docker, and Google Cloud.

REQUIREMENTS

- Minimum of 3 years of professional software development experience
- 2+ years of experience with PostgreSQL
- 2+ years of experience with backend JavaScript
- Experience with TypeScript
- Strong analytical skills and the ability to solve problems systematically
- Knowledge and experience with Kubernetes, Docker, and Ubuntu
- Experience with cloud computing services such as GCP (preferred), Azure, or AWS
- Ability to work independently and translate requirements into effective solutions
- Excellent communication skills in English; knowledge of Dutch is a plus
- Creativity, critical thinking, a good sense of humor, and a passion for your craft

BENEFITS

- Competitive salary ranging from €3,000 to €4,500 gross per month
- 8% holiday allowance

- Flexible working hours, with the option to work partially from home
- Training and onboarding in Canada, including team introduction and in-depth training on the ERP system
- Opportunity to work with advanced technologies and contribute to innovative projects
- Part of an international team with an informal and open company culture
- Minimal pension scheme and other secondary benefits in line with those offered within the Bizcuit Group
- The chance to grow with a dynamic and fast-growing company that leads in the ERP sector
