HAYSTACK PEOPLE

Node & Typescript developer | Delft

ScaleUp | Vast | 50k

COMPANY PROFILE

Our client, based in Delft, specializes in delivering innovative e-learning solutions. They offer an e-learning platform that allows companies to create, manage, and track internal training programs. This empowers their global clientele to effectively educate their employees and monitor training progress.
An example of their work in practice includes collaborations with multile companies who utilize their e-learning platform to train their franchise units worldwide. Their clients rely on them to deliver high-quality training and monitor employee progress.
Over the past ten years, their platform has become a leading player in the e-learning market. They have a team of 8 developers and are looking for a medior Back-End TypeScript Developer to help them grow and serve their clients even better. This company is committed to innovation and customer-centricity, striving to provide the best e-learning solutions to organizations globally. As a part of their team, you can contribute to improving the way businesses educate and develop their employees.

ROLE DESCRIPTION

As a Back-End TypeScript Developer within our client's organization, you will have an incredibly versatile role with a great deal of freedom and influence. At this moment there are nine other developers within this company. Your responsibilities will vary, including solving bugs that current clients encounter in their software, converting legacy code to the TypeScript stack where your expertise lies, and developing new features for both existing and new clients. Within this organization, you have the freedom to choose which tasks you want to focus on in the coming period. Developers in this organization have frequent contact with clients to ensure that their wishes are met.

REQUIREMENTS

- Minimum of 3 years of experience as a TypeScript developer.
- A BSc or MSc degree, preferably in computer science or a related field.
- Preference for agile work methods to achieve maximum results in small steps.
- Knowledge of automating and implementing recurring tasks in continuous integration and deployment systems.
- Experience with Test-Driven Development (TDD) and the ability to deliver high-quality code.
- Strong team player who maintains motivation.
- Fluent in English, residing in the Netherlands.
- Bonus points for experience with Node.JS, Docker, PHP, and AWS services.

OFFER

- Salary ranging from €3500 to €4500.
- Hybrid work environment (2 days in the office).
- Flexible work hours.
- Opportunities to participate in courses and conferences.
- Room and time to explore whether new technologies can contribute to the company's growth.
- No overtime is required.
