HAYSTACK PEOPLE

Node.JS developer

StartUp | Vast | 80k

BEDRIJFSPROFIEL

Our client is a startup challenging traditional players in the parking industry, such as Easypark and Parkmobile, with their innovative solution for consumers and businesses. Founded four years ago, the company has quickly established itself among existing market leaders. Currently supported by a team of 20 enthusiastic professionals, including 4 senior developers, they have successfully raised investments, ensuring a robust financial foundation. They continue to innovate to conquer the market.

At the core of our client's product is an advanced app and its associated cloud infrastructure, built using cutting-edge technologies such as GCP, React, React Native, and TypeScript. These tools form the backbone of a platform that goes beyond existing apps, simplifying payment for parking hours. Our client's vision extends to encompassing all aspects of parking, including charging stations and car-sharing locations, providing a comprehensive solution for mobility needs in the Benelux region.

With a bold approach to parking management, the client's team aims to overcome parking challenges in urban areas. Their commitment goes beyond providing easy access to parking spots; they also contribute to sustainability and mobility.

The company is currently in a significant growth phase, expanding not only its software but also its market presence. Recent efforts include extending services to the Benelux region. The company culture is characterized by a dynamic work environment where flexibility and results-oriented attitudes coexist. Our client not only prioritizes innovation in their product but also values the development of their employees, offering a stimulating work environment.

FUNCTIE OMSCHRIJVING

As a Backend Developer at our client's company, you play a crucial role in developing high-quality solutions and serving as a troubleshooter for parking lot owners and collaboration partners. Working within a small, dynamic team of developers, you contribute to the creation of user-friendly features for the innovative parking application.

In this role, your focus is on writing new code since there is no legacy code. You have the freedom to optimize processes, with effective collaboration within the team. Knowledge sharing is crucial, and you provide regular updates to the team every two weeks, keeping everyone informed of progress and developments within the company.

You are not limited to local challenges; if feasible, you contribute to the further development of the application in international markets. This opportunity allows you to contribute to the international growth of the company, extending your impact far beyond the local parking context. As a Backend Developer, you are not only responsible for code but also serve as a problem solver and a key player in the pursuit of innovative mobility solutions.

FUNCTIE EISEN

- Experience in larger environments, bringing the knowledge to help the company scale.
- Minimum 5 years of experience in backend development, preferably with a strong focus on JS backend.
- Extensive experience with Node.js and related technologies such as GCP, React, React Native, and TypeScript.
- Demonstrated experience in leading large-scale migration projects and end-to-end integrations.
- Willingness to help the organization mature and take on a mentoring role.
- In-depth knowledge of architecture principles and practices.

ARBEIDSVOORWAARDEN

- Depending on experience, a salary up to €80k.
- 25 vacation days.
- Flexible working hours to accommodate individual goals.
- Monthly team social events.
- Opportunities for international work.
- Free parking at locations connected to the app.
- Discounts on facilities at locations linked to the app.
