HAYSTACK PEOPLE

PHP developer | Fintech

ScaleUp | Vast | 65k

WHERE ARE YOU GOING TO MAKE MAGIC HAPPEN:

Our partner has been developing its own advanced credit management software for about ten years now. A system that meets the rapidly evolving market needs of today's businesses. our Partner is the only supplier in the Netherlands that combines in-house developed credit management software with its own credit information database. Their platform allows customers to combine different modules in one system. This makes it easy to perform complete credit management efficiently in one application. Together with their customers, they are working daily to improve their products. For example, in cooperation with their customers and with the help of credit insurance companies Atradius, Euler and Coface, they have developed a unique policy management solution. The PolicyManager!
In addition to their credit management solutions, they have launched SalesOptimizer in collaboration with a group of international colleagues. A marketing information tool linked to their company database. The tool gives you instant insight into the potential and creditworthiness of your prospects and customers. Marketing information with the flavour of a credit information database.

WHAT KIND OF MAGIC ARE YOU MAKING?

As a backend PHP developer, you will work with the development team to not only improve the software modules, but also to develop new functionalities. You will have an important task within the team. Among other things, you will help think about how functionalities can best be developed. You are not afraid to take the lead. In addition, you identify opportunities and areas for improvement and translate these into effective solutions for their customers. With your innovative vision and IT brain, you are also constantly looking for improvements and ease of use of the modules on a strategic level.

WHAT DO YOU NEED TO MAKE THIS ALL HAPPEN?

You are results-oriented, can work well independently and have a great sense of responsibility. You are a thinker and a doer. In addition, you have a passion for online software and preferably have experience within a SaaS company. Furthermore you have:

- HBO/WO level of education;
- At least 3 years of experience with PHP;
- Experience and/or interest in SOAP/REST web services (creating and linking);
- Experience with MySQL, linking multiple tables together is not a problem;
- You know your way around Linux servers;
- You have worked or can work with Git

OFFER

- A full-time position based on 40 hours per week;
- An excellent salary based on your experience (up to 65k);
- 26 vacation days per year (based on 40 hours per week) with the option to purchase additional days;
- Fixed-term contract with the prospect of permanent employment;
- During lunch or after work there is always time for relaxation! Who will you beat with table soccer? they regularly organize fun parties and do a lot of informal get-togethers;

- Would you like to work at the most beautiful location in Noordwijk? Only 2 minutes walk from the beach with always enough parking space.

Are you interested? Then respond via the application form or send your resume to r.sadloe@haystackpeople.nl. Calling is always faster, you can do that on +31 (0)6 83 93 19 68
