HAYSTACK PEOPLE

QA Engineer – Ownership in Test Automation

Established | Vast | 80k

COMPANY PROFILE

Our client is a scale-up in the education industry, building one central platform for professional learning across Europe. Already live with thousands of users, the product is scaling fast with new acquisitions and feature roll-outs.

Team culture: supportive, international, and ambitious. Two office days a week (Mon & Wed, Utrecht) keep the team connected; the rest is flexible remote. They value ownership, pragmatism, and people who want to grow with the company.

JOB DESCRIPTION

As Test Automation Engineer, you will:

- Take the lead in test automation strategy and execution.
- Reduce manual testing, increase coverage, and speed up releases.
- Collaborate with developers, product owners, and designers.
- Support exploratory and release testing.
- Help shape the QA culture in a growing engineering team.

JOB REQUIREMENTS

- Several years of QA experience (automation focus).
- Playwright/Typescript or similar frameworks.
- Strong exploratory/manual testing skills.
- Communicative, proactive, quality-obsessed.
- Fluent English, EU work permit, 2 days Utrecht.

TERMS OF EMPLOYMENT

- Salary up to €6.000/month.
- 26 vacation days, pension, team lunches.
- Hybrid setup with flexibility.
- Fun team events and ownership in QA maturity.

Want to shape a European SaaS platform where your work in QA directly impacts thousands of professionals?
