HAYSTACK PEOPLE

Senior Fullstack Engineer | Insurtech (EN)

ScaleUp | Vast | 70k

WANT TO KNOW MORE ABOUT THE COMPANY?

Our client is active in the insurance industry, but they're not an insurance company. Instead of using the few major software houses in the industry, they've opted to build their own system from scratch using a modern tech stack with a best-in-class continuous delivery pipeline. This has proven to be a success, as they got a venture capital investment worth over €20 million to take over the European market.

They are a true tech scale-up based in Rotterdam with an HQ in London. As a fast-growing company they are constantly improving their business process and articulate trade-offs with each technical decision, and the developers play a major part in this.

WHAT'S YOUR ROLE?

You'll be working in a small and ambitious team as they build an industry-leading product. To succeed, you'll need solid experience in Laravel, DDD, and running scalable solutions in production.

Insurance is complex and fascinating. You should want to soak it up and, ideally, derive real enjoyment from mastering an intellectually stimulating industry - whilst working to change it for the better!

On a day to day basis, you could be:

- Pairing and doing Google-style PR reviews
- Getting involved in problem-solving on whiteboards with your team
- Integrating with CRMs, payment gateways, billing systems, analytical tools, etc.
- Creating or contributing to open source projects to give back
- Going to developer meetups regularly
- Improving our processes to remove any pain points in engineering

WHAT DO YOU BRING TO THE TABLE?

They don't like to put people into boxes and are actively searching for ways to innovate and change, but it's safe to say that you will have:

- Deep knowledge of Laravel and how it can be used to efficiently deliver features
- Appreciation of the Laravel ecosystem amongst Vue, Tailwind, LiveWire and others
- The ability to create simple solutions to complex problems
- An appreciation for Event Sourcing and how it can be used an effective tool
- ❤ for what Laravel does for PHP

WHAT YOU'LL GET IN RETURN?

- A competitive salary and the ability to grow your career at the UK’s leading Insurtech
- An amazing team and founders, supportive board and investors
- 25 days holiday - so there’s plenty of time for work, rest, and play
- Vitality private health and dental insurance

- Great pension (up to 10% on top of your salary)
- Cycle to work scheme
- Latest Apple tech gear
- Fun, modern and informal office environment with regular team social events
- Central London location with the best lunch in town (Borough market!)
- Hybrid way of working for the perfect work/life balance.
