HAYSTACK PEOPLE

# Senior PHP Developer for Marketleader E-commerce

Established | Vast | 70k

## ABOUT THE COMPANY

With nearly 4 million customers, our client is the market leader in the online sale of office supplies and electronics. Additionally, the client has several sister companies across the Netherlands and Europe, all of which use the same systems, fully developed in-house by their own development teams.

## ABOUT THE JOB

As a developer, you won’t be directly working on the webshops themselves but rather on the various internal systems that form the backbone of this organization. Think of a powerful ERP system that not only optimizes the processes for our client but also supports sister companies across the Netherlands and Europe. Your role will be crucial in continuously improving and expanding these systems.
You'll be working with a modern tech stack that includes PHP Symfony, ElasticSearch, RabbitMQ, Redis, and MySQL 8. The company ensures everything stays up-to-date and is open to turning your initiatives and good ideas into reality. Do you enjoy tackling challenging projects and aren’t intimidated by complex migrations? Do you love working on new technical features? If so, this is the place where you can let your expertise flourish!

**Which team will you be joining?**

With an IT department of 70-80 people, you will join one of the eight dynamic Scrum teams. Which team you’ll strengthen depends on your personal goals and ambitions. Each team works on different internal software, giving you the opportunity to take on challenging developments, both independently and as part of a team. The company is constantly striving for improvement, so if you bring forward great ideas, you’ll have the space to put them into practice.

**Despite the large team, your personal development as a developer is a top priority.**

You will have plenty of opportunities to grow and sharpen your skills. The company even hosts innovation days, giving you the space to work on creative and groundbreaking projects.

## WHAT ARE THEY LOOKING FOR?

- HBO working and thinking level
- 5+ years of experience in PHP
- Proficient in working with Symfony
- Eager to learn and ambitious
