
Site Reliability Engineer - Crypto Infrastructure (GCP, Terraform, K8s)

ScaleUp

Vast

80k

COMPANY PROFILE

Based in North Holland, our client is on a mission to make crypto trading easy and secure. With ~100 employees and a strong engineering backbone, they operate a trading platform that depends on fast, resilient and compliant infrastructure. The DevOps/SRE team (1 lead + 2 seniors) owns the full deployment landscape, working closely with development and security.

The office near Schiphol offers perks like a private gym, in-house bar, and strong team culture. Engineers work hybrid — 3 days on-site, 2 remote — and are trusted with real autonomy.

JOB DESCRIPTION

As an SRE, you'll:

- Design and manage cloud infrastructure (GCP) for trading-critical microservices
 - Harden infrastructure using Terraform, GitHub Actions and ArgoCD
 - Maintain and extend CI/CD pipelines for stability and speed
 - Proactively monitor and prevent issues using Prometheus, Grafana and related tools
 - Ensure infra compliance with crypto regulation and audit standards
 - Work closely with other engineers to support scalable deployments
-

REQUIREMENTS

- 4+ years in DevOps/SRE roles
- Strong GCP knowledge (GKE, Cloud Run, IAM, networking)
- Hands-on with Kubernetes, Terraform, ArgoCD
- Experience with production CI/CD setups (GitHub Actions, pipelines)
- Fluent English, based in the Netherlands (no visa support)

WHAT YOU GET IN RETURN

- Salary: €5.500–€7.500 per month + 8% holiday allowance + 13th month bonus
- Hybrid work (3 days on-site in Schiphol-Rijk)
- Full ownership within a technical DevOps team
- Free lunch, gym access, massage chair, bar and team events
- 25 vacation days, pension, and Alleo benefits
- €250 home office setup budget

Are you excited about this opportunity? **Apply now** via the button or send your CV to s.jouseiph@haystackpeople.nl. We look forward to hearing from you!
