ABOUT THE COMPANY

Every day, this platform processes millions of transactions for thousands of businesses across the Netherlands. As a Platform Engineer, you'll help build and improve the infrastructure that powers a business-critical fintech platform. You'll work on Kubernetes, automation, observability, security and platform reliability while collaborating closely with Development, Security and Compliance teams.

ROLE OVERVIEW

Why engineers enjoy working here:

- Millions of transactions processed every day
- Direct impact on platform architecture and technical decisions
- Strong focus on Kubernetes and platform engineering
- Reliability, observability and automation are core priorities
- Security-first culture within a regulated fintech environment
- Modern engineering team with short communication lines

What you'll be doing:

- Building and improving Kubernetes platforms
 - Developing Infrastructure as Code
 - Managing and automating Linux environments
 - Improving CI/CD pipelines and deployment processes
 - Implementing monitoring, logging, tracing and alerting solutions
 - Increasing platform reliability, scalability and performance
 - Contributing to platform architecture and engineering decisions
 - Working closely with Development, Security and Compliance teams
-

REQUIREMENTS

- Experience as a DevOps Engineer, Platform Engineer or SRE
- Linux experience (Ubuntu / Debian)
- Production Kubernetes experience
- Experience with Infrastructure as Code
- Experience with CI/CD tooling
- Bash, Python and YAML experience
- Knowledge of observability and monitoring platforms
- Understanding of security principles and secure system design

WHAT'S OFFERED

- €5.000 - €6.400 gross per month
- 32-40 hours
- Hybrid working (3 days on-site)

- Training and certification budget
- On-call compensation
- Pension scheme
- Significant influence on platform development
- Experienced engineering team with strong knowledge sharing

Please note: candidates must already be living and working in the Netherlands. Visa sponsorship is not available. Interested? Feel free to send an e-mail to m.froentjes@haystackpeople.nl
