BEDRIJFSPROFIEL

Our client is a dynamic and innovative digital agency that specializes in delivering tailored, high-performance solutions for a broad range of clients. Their focus lies in creating scalable, secure, and efficient cloud infrastructures that meet the evolving needs of modern businesses. With a strong reputation for excellence, they work on projects ranging from e-commerce platforms to complex B2B solutions, delivering seamless integrations and high availability.

They are deeply committed to technological advancement, continuously exploring the latest cloud tools and DevOps methodologies. The team values proactive collaboration, where developers and engineers work closely together to ensure robust solutions. As they expand their client base, they need experienced engineers who can build infrastructure from scratch, ensure smooth deployments, and address client needs with tailored solutions.

In this role, you won't be merely fixing tickets; instead, you'll engage directly with clients, transforming their problems into well-thought-out, strategic solutions. You'll also provide guidance to development teams, ensuring that infrastructure and applications run efficiently and securely. The company fosters a culture of growth, giving you the chance to push your skills further while working on impactful, real-world projects.

FUNCTIE OMSCHRIJVING

As a Senior DevOps & Cloud Engineer, your primary responsibility will be designing and managing Azure cloud infrastructures from the ground up. You'll serve as a crucial bridge between clients and the development team, ensuring that infrastructure and cloud environments meet the demands of each project. This role goes beyond simply responding to tickets—you'll have the autonomy to identify and implement solutions proactively.

Your responsibilities will include:

- Building and managing cloud environments in Azure, starting from scratch.
- Working closely with clients to understand their requirements and provide tailored solutions.
- Supporting development teams by implementing and optimizing infrastructure for performance and scalability.
- Ensuring continuous integration and delivery pipelines are functioning smoothly and securely.
- Solving complex cloud and infrastructure challenges independently, with minimal oversight.
- Maintaining open communication with clients to ensure satisfaction and provide technical guidance.

FUNCTIE EISEN

- A minimum of 5 years of experience working with Azure, including designing and deploying cloud infrastructures.
- Strong expertise with DevOps tools like Terraform, Kubernetes, Docker, and Azure DevOps.
- Experience with automation processes and CI/CD pipelines, with a focus on efficiency and security.
- Excellent problem-solving skills and the ability to work independently on complex infrastructure projects.
- Experience in client-facing roles, with a proven ability to translate technical challenges into actionable solutions.
- Knowledge of cloud security best practices and experience in maintaining secure infrastructures.

ARBEIDSVOORWAARDEN

- A challenging and rewarding role within an innovative, forward-thinking digital agency.
- Competitive salary ranging from €5000 to €6500, depending on your experience.
- Flexible working hours and the ability to work remotely part-time.
- A culture that encourages continuous learning and professional development.
- Opportunities to work on diverse projects for well-known clients across various industries.
