HAYSTACK PEOPLE

# React developer | SaaS Job within software agency

ScaleUp | Vast | 70k

## COMPANY PROFILE

Our client is a digital agency based in Rotterdam, serving major clients across the Netherlands. They excel in creating data-driven solutions, have a creative mindset, and a strong capability to deliver high-quality software. They provide their clients with a full range of digital needs, including digital strategy, website creation, performance marketing, photography and videography, AI solutions, e-commerce platforms, and more. With a team of 25 employees, they boast a diverse group of strategists, designers, and developers. They work in multidisciplinary teams and co-create with their clients. This company has a diverse portfolio of projects, including short-term, long-term, and ongoing projects. For this role, you will be working on the company's most important ongoing project alongside another front-end developer.

At our client, it's about more than just work; it's about growing, innovating, and making an impact together. If you're ready to take your career to the next level and be part of a team that truly makes a difference, this agency is the perfect place for you.

## JOB DESCRIPTION

As a front-end developer, you will contribute to a large-scale project for an international client. You will have the opportunity to play a crucial role in developing advanced software that will indirectly save lives worldwide. You will work on various aspects of the platform, such as stabilization, performance improvements, and renewing the tech stack by introducing design patterns. It's important to note that this is a long-term position where you will work closely with another front-end developer. Therefore, you should be eager to focus on one major project rather than seeking a role with multiple projects.

## RESPONSIBILITIES

- Develop and maintain high-quality applications with a strong focus on React.
- Build clear and reusable components that contribute to the larger ecosystem of the platform.
- Manage complex state management solutions within large applications using Zustand.
- Contribute to the foundation of the platform by introducing architectural designs and improving the technical stack.
- Communicate professionally with the international client and stakeholders in English.

**Requirements:**

- At least 3 years of professional experience as a front-end developer with React.
- Excellent communication skills and fluency in both Dutch and English.
- A proactive attitude suitable for a scale-up environment.
- Preferred: experience with RxJs and Angular.

You will be working in an informal organization with a young and driven team of colleagues. They offer you complete freedom and support to develop yourself within an open and innovative culture with plenty of room for initiative. They challenge each other and appreciate people who take the lead.

## BENEFITS

- A salary between €3,000 and €5,500 gross per month (based on experience, skills, and potential).
- A pension scheme.
- A contract for 32 to 40 hours per week.
- A beautiful office in Rotterdam.
- Shared extensive lunch.
- The possibility to work from home 4 days a week.
- A monthly training budget.
- 26 vacation days per year.
- 8% holiday pay.
- Laptop provided.
