HAYSTACK PEOPLE

Senior C#.NET Developer

StartUp | Vast | 85k

BEDRIJFSPROFIEL

Evesto, a pioneering force in the electric mobility realm since 2020, is dedicated to crafting cutting-edge software solutions for charge point operators worldwide. Spanning four continents, our global presence reflects our commitment to driving innovation in this rapidly evolving sector. Our mission? To seamlessly connect millions of charging stations worldwide, guided by a lean yet dynamic team inspired by the efficiency of tech giants like WhatsApp.

At the heart of our endeavors lies our flagship platform meticulously crafted using **C#** and **Blazor**, operating seamlessly on the robust infrastructure of **Microsoft Azure**. Our development ethos blends backend and frontend expertise, ensuring a rich tapestry of innovative projects. Whether your passion lies in serverless architecture or scalability challenges, Evesto offers an environment ripe for continuous growth and learning alongside seasoned industry experts.

Team Dynamics:
Join forces with a vibrant ensemble featuring individuals like Tom, our .NET 8 aficionado and software architect; Riccardo, renowned for his grounded approach and CrossFit dedication; and Martin, the creative mind behind our "goal of the day" initiative. Are you a gaming aficionado, partial to titles like Dota, Factorio, Overwatch, or CSGO? You'll find a welcoming community here, with ample opportunities to bond over games beyond office hours.

FUNCTIE OMSCHRIJVING

As an experienced C# Developer at Evesto, you'll join our growing software development-team of 5 Medior / Senior developers (supported by our 3 founders who also have a background in software development). You will be actively involved in both front-end (Blazor) and back-end (C#.NET) development, with a focus on the latter. In addition to maintenance and implementing new features, scalability is a hot topic. Right now, our software energizes a significant number of charging stations worldwide, spanning several continents. But what happens when that number grows tenfold?

Given that Evesto is still in its early stages, the same applies to the market. This means you'll have plenty of room to pioneer and devise solutions based on the rapidly changing demands in the market.

FUNCTIE EISEN

Who You Are:
An ambitious tech enthusiast with a fervent dedication to innovation. You seek a role that not only challenges and nurtures your growth but also fosters a sense of camaraderie and healthy competition within a dynamic team environment.

Requirements:
- Bachelor's / Master's degree or equivalent experience
- Strong knowledge of C#.NET
- Experience with Azure Functions and/or Servicebus.

- Experience with Blazor is a plus

- Solid understanding of at least the English language (at this time, Dutch is the language of communication with us)

- Ability to work independently and take responsibility in feature development.

ARBEIDSVOORWAARDEN

We Offer:

• A competitive monthly salary ranging from €5,000 to €6,500+, commensurate with experience.

• A vibrant, collaborative workspace in our newly minted office, complemented by remote work flexibility as needed.

As well as:

- 25 paid holidays

- 8% holiday allowance

- Pension

- Travel allowance / Public transport subscription / Electric bicycle

- Flexible working hours (32-40)

- Hybrid working (~2 days from our office)

- Indefinite contract directly by start

How to Apply:

Ready to embark on a journey to revolutionize electric mobility with us? Waste no time and submit your application now, or feel free to reach out to our partner Haystack People to commence discussions about your potential future at Evesto.
