HAYSTACK PEOPLE

Vue Developer | SaaS

ScaleUp | Vast | 65k

COMPANY PROFILE

Our client is a rapidly growing company that specializes in designing and developing innovative digital healthcare products that are decentralized, standardized, and reusable. They approach healthcare by collaborating with stakeholders across all domains to ensure our solutions meet the needs of healthcare practitioners and citizens alike. Whether you are a healthcare professional or a patient, their products are designed to simplify your life. This company has a diverse team of creative and ambitious professionals from over 15 countries, including software engineers, designers, product owners, and healthcare experts. They believe in fostering a culture of individual autonomy and responsibility, with a highly flexible work environment that allows team members to work from home, the office, or anywhere in between.

ROLE DESCRIPTION

Our client is in search for a front-end developer with extensive experience in Vue and NuxtJS. You will play a key role in their mission to enhance healthcare in the Netherlands. Their teams are in constant iteration, solving problems, and working collaboratively to empower people across the Netherlands to take control of their healthcare journey. At our client, they work with a microservices architecture and leverage cutting-edge technologies such as Kubernetes and Helm, Vue, Typescript, Java Spring Boot, Rust, FHIR, and more.
As a Frontend engineer, your core responsibilities will include:

- Creating new features and front-end components for all of our client-facing microservices.
- Developing internal tools for other developers, such as setting up testing frameworks and expanding the component library for our services.
- Collaborating with Product Designers, Product Managers, and Software Engineers to deliver engaging user-facing products and experiences.

REQUIREMENTS

- A bachelor degree or higher in Software Development or a related field.
- Minimum of 2 years of experience as a Front-End developer.
- Fluent English speaking and writing skills.
- Team player who thrives in a multidisciplinary team.
- Experience with our front-end technology stack (Typescript, Vue, Tailwind CSS, and NuxtJS), as well as Docker, Kubernetes, and Linux (or MacOS).
- Experience in building design systems and component libraries.

OFFER

- Salary till 5000 euro's
- Commuting allowance, including the option of a sponsored OV-Chipkaart.
- 25 holidaydays and 8% holiday allowance.
- A company laptop.
- Pension plan with only a 3% contribution.

- Developmental opportunities related to your career growth, such as internal training and the ability to take external training if desired (€400 annual budget).
- Option to work remotely
