HAYSTACK PEOPLE

Vue.js Developer | Cloud Communication Services

StartUp | Vast | 55k

WHAT DO THEY DO?

Our client is a Dutch company focused on providing cloud communications services to business customers. They offer telephony, internet, messaging and collaboration solutions, helping companies to optimize their communications and connectivity. Because of their success, they were recently acquired and even more rapid growth is possible.
Some examples of the services our client offers include cloud telephony, where phone calls are handled over the Internet, eliminating the need for companies to manage their PBX themselves. They also offer Internet access services, including fiber connections and VPN solutions for companies that have multiple offices. In addition, they offer integrations with popular software applications, such as Microsoft Teams and Google Workspace.
The company positions itself as a flexible and reliable partner that thinks with the customer and offers customized solutions. They have multiple data centers in the Netherlands and are able to provide 24/7 support to their customers.

WHAT ARE YOU GOING TO DO?

As a Medior Vue.js developer, you will be responsible for developing and maintaining software applications. You will work closely with other developers, designers and product managers to create the best user experience for customers.
Your duties include:

- Develop new features and functionalities in Vue.js for the advanced communication solutions
- Writing high-quality, efficient and reusable code
- Maintain and improve existing code and applications
- Testing code and applications to ensure quality
- Collaborate with other team members to solve problems and achieve project goals

As a Medior Vue Developer, you will work on advanced communication solutions that help companies manage and improve their communications. They not only provide access to a dial that allows you to call foreign numbers, but also access to our extensive network of partners, such as Aventel. The services are suitable for everyone, whether you work with a PBX with a central point or a PBX attached to a data center. Moreover, there are also hosting environments with 1 server on which you can set up multiple companies (multi-tenant environment).

MINIMUM REQUIREMENTS

So what is the minimum you need to be able to do?

- At least 3 years of experience as a front-end developer, including at least 2 years of experience with Vue.js
- Experience with HTML5, CSS3 and JavaScript
- Good knowledge of web standards and protocols
- Experience with version control, preferably Git
- Strong communication skills and team player mentality
- A proactive attitude, independence and a passion for writing high-quality code

PACKAGE

This is what you get in return:

- Salary up to €55k
- Hybrid working environment 3 days in the office
- A challenging and varied job with our client, the company that provides the solution for companies looking for a modern, advanced way to manage their communications
- Opportunities for personal and professional growth within a fast-growing company
- An informal and friendly work atmosphere, with fun and talented colleagues
- Flexible working hours
